## M.Tech. Scheme of Examination & Syllabus 2024-25

### MECHANICAL ENGINEERING

#### THIRD SEMESTER

| Course Code  | Course Name                  | Th | Tu | Pr | Credits | Evaluation |     |       |
|--------------|------------------------------|----|----|----|---------|------------|-----|-------|
|              |                              |    |    |    |         | CA         | ESE | Total |
| 24CAD302T(i) | PE-V Supply Chain Management | 3  | -  | -  | 3       | 30         | 70  | 100   |

| Course Objectives   | Course Outcomes  |
|---|--|
| To provide knowledge of strategic importance of supply chain design and planning of an organization, the role of inventory management and forecasting in a supply chain, facility planning and scheduling models. | <ul style="list-style-type: none"><li>• Define the goal of a supply chain and analysis the impact of supply chain</li><li>• Decisions on the success of a firm and Identify drivers of supply chain performance.</li><li>• Analyse demand forecasts and supply for both an enterprise and a supply chain</li><li>• Apply operations planning, MRP, and aggregate planning concepts in a supply chain.</li><li>• Design a supply chain network for a firm or organisation</li><li>• Judge and select the best supplier for a firm or organisation</li></ul> |

|  |        |
|--|--------|
| <b>Unit I</b>  | [8Hrs] |
| Introduction to Supply Chain Management: Understanding the supply chain, Supply Chain Performance- Achieving strategic fit and scope, complexity, key issues, Supply Chain Drivers and Metrics, Centralized vs. decentralized systems  |        |
| <b>Unit II</b>   | [8Hrs] |
| Planning Demand and Supply in a Supply Chain: Forecasting-Need for forecasting, Quantitative methods. Inventory Management- Various costs in inventory management and need, Deterministic models and discounts, Probabilistic inventory management. Aggregate Planning The Role of Aggregate Planning, Aggregate Planning Strategies.                  |        |
| <b>Unit III</b>  | [8Hrs] |
| Facility Planning and Scheduling models: Facility layout and location-Qualitative aspects, Quantitative models for layout decisions, Product, process fixed position, group layout, Location decisions-quantitative models. Scheduling models-Scheduling in MRP system, Sequencing rules and applications, Batch production sequencing and Scheduling. |        |
| <b>Unit IV</b>   | [8Hrs] |
| Designing the Supply chain network: Distribution Networks-Design options for a distribution network, e-Business and the distribution network, Network design in an uncertain environment. Transportation Networks-Design options for a transportation network, Trade-offs in transportation design, Supply Chain Optimization                          |        |
| <b>Unit V</b>  | [8Hrs] |
| Managing Cross-Functional Drivers in a Supply Chain: Sourcing Decisions-Make or buy decisions, Third-and fourth-party logistics providers, Sourcing Processes. Pricing and Revenue Management in a Supply Chain, Information Technology in a Supply Chain, Coordination in a Supply Chain  |        |

#### Text Books

### MECHANICAL ENGINEERING

#### THIRD SEMESTER

| Course Code   | Course Name                   | Th | Tu | Pr | Credits | Evaluation |     |       |
|---------------|-------------------------------|----|----|----|---------|------------|-----|-------|
|               |                               |    |    |    |         | CA         | ESE | Total |
| 24CAD302T(ii) | PE-V Advance Mechanism Design | 3  | -  | -  | 3       | 30         | 70  | 100   |

| Course Objectives   | Course Outcomes  |
|---|--|
| To make students well versed with advance concepts of mechanism analysis like kinematic analysis, position and displacements, synthesis of mechanism and analysis of robotic arm. | <ul style="list-style-type: none"><li>• Understand basic mechanisms in machines. DOF</li><li>• Perform a kinematic analysis various mechanisms for velocity and acceleration.</li><li>• Determine position and displacements of moving points of mechanisms.</li><li>• Synthesize various mechanisms</li><li>• Perform forward and inverse kinematics of robotic arm and its linkages.</li></ul> |

|  |        |
|--|--------|
| <b>Unit I</b>  | [8Hrs] |
| Introduction: Review of fundamentals of kinematics, Mobility analysis, Formation of one D.O.F. multi loop kinematics chains, Network formula: Gross motion concepts  |        |
| <b>Unit II</b>   | [8Hrs] |
| Kinematic Analysis: Position Analysis: Vector loop equations for four bar, Slider crank, inverted slider crank, Geared five bar and six bar linkages, Analytical methods for velocity and acceleration analysis, Four bar linkage jerk analysis, Plane complex mechanisms.   |        |
| <b>Unit III</b>  | [8Hrs] |
| Position and Displacement: Locus of moving point, position of point, position difference between points, apparent and absolute position of points, Loop closure equation, Graphical position analysis  |        |
| <b>Unit IV</b>   | [8Hrs] |
| Synthesis of Mechanism: Type synthesis, Number synthesis, Associated Linkage Concept, Dimensional synthesis, function generation, Path generation, Motion generation, Graphical Methods, Cognate linkages, Coupler curve synthesis, Design of six-bar mechanisms. Algebraic methods, Application of instant center in linkage design. Cam Mechanisms, determination of optimum size of Cams. |        |
| <b>Unit V</b>  | [8Hrs] |
| Robotics: Introduction, Topological arrangements of robotic arms, forward kinematics, Inverse position analysis, Inverse velocity and acceleration analysis, Robot actuator force analysis   |        |

#### THIRD SEMESTER

| Course Code   | Course Name          | Th | Tu | Pr | Credits | Evaluation |     |       |
|---------------|----------------------|----|----|----|---------|------------|-----|-------|
|               |                      |    |    |    |         | CA         | ESE | Total |
| 24CAD303T (i) | OE-Industrial Safety | 3  | -  | -  | 3       | 30         | 70  | 100   |
|               |                      |    |    |    |         |            |     |       |

| Course Objectives  | Course Outcomes   |
|--|---|
| The objectives of subject is to prevent accidents in industry by reducing any hazard to minimum and to reduce workman's compensation, insurance rate and all the cost of accidents along with improvement in occupational health and safety and its management | <ul style="list-style-type: none"><li>• Develop students to handle the complex industrial environment</li><li>• Give knowledge about occupational health, industrial hygiene, accidental prevention techniques to the students.</li><li>• Make the student aware about safety auditing and management systems, pollution prevention techniques etc.</li><li>• Train the students about risk assessment and management in Industry</li></ul> |

|   |        |
|---|--------|
| <b>Unit I</b>   | [8Hrs] |
| Occupation, Safety And Management; Occupational Safety, Health and Environmental Safety, Management – Principles & practices, Role of Management in Industrial Safety, Organization Behavior on Human factors contributing to accident.   |        |
| <b>Unit II</b>  | [8Hrs] |
| Planning for Safety: Planning: Definition, purpose, nature, scope and procedure. Management by objectives and its role in Safety, Health and Management (SHE)   |        |
| <b>Unit III</b>   | [8Hrs] |
| Monitoring for Safety, Health & Environment: Occupational Safety, Health and Environment Management System, Bureau of Indian Standards on Safety and Health: 14489 – 1998 and 15001 – 2000, ILO and EPA Standards. Principles of Accident Prevention: Definition: Incident, accident, injury, dangerous, occurrences, unsafe acts, unsafe conditions, hazards, error, oversight, mistakes etc.  |        |
| <b>Unit IV</b>  | [8Hrs] |
| Education, Training and Employee Participation in Safety: Element of training cycle, Assessment of needs. Techniques of training, design and development of training programs. Training methods and strategies types of training. Evaluation and review of training programs. Competence Building Techniques (CBT), Concept for training, safety as a on-line function. Employee Participation: Purpose, areas of participation, methods, Role of trade union in Safety, Health and Environment Protection. |        |
| <b>Unit V</b>   | [8Hrs] |
| Management Information System: Sources of information on Safety, Health and Environment Protection. Compilation and collation of information, Analysis & use of modern methods of programming, storing and retrieval of MIS for Safety, Health and Environment. QCC HS Computer Software Application and Limitations.   |        |

| 24CAD303T(ii) | OE-Operations Research | 3  | -  | -  | 3       | 30         | 70  | 100   |
|               |                        |    |    |    |         |            |     |       |

| Course Objectives   | Course Outcomes   |
|---|---|
| To make students well versed with advance concepts of Operations research like dynamic programming, non-linear programming, sensitivity analysis and other real world problems. | <ul style="list-style-type: none"><li>• Students should able to apply the dynamic programming to solve problems of discreet and continuous variables.</li><li>• Students should able to apply the concept of non-linear programming</li><li>• Students should able to carry out sensitivity analysis</li><li>• Student should able to model the real world problem and simulate it.</li></ul> |

|   |        |
|---|--------|
| <b>Unit I</b>   | [8Hrs] |
| Optimization Techniques, Model Formulation, models, General L.R Formulation, Simplex Techniques, Sensitivity Analysis, Inventory Control Models                         |        |
| <b>Unit II</b>  | [8Hrs] |
| Formulation of a LPP - Graphical solution revised simplex method - duality theory - dual simplex method - sensitivity analysis - parametric programming                 |        |
| <b>Unit III</b>   | [8Hrs] |
| Nonlinear programming problem - Kuhn-Tucker conditions min cost flow problem - max flow problem - CPM/PERT  |        |
| <b>Unit IV</b>  | [8Hrs] |
| Scheduling and sequencing - single server and multiple server models - deterministic inventory models - Probabilistic inventory control models - Geometric Programming. |        |
| <b>Unit V</b>   | [8Hrs] |
| Competitive Models, Single and Multi-channel Problems, Sequencing Models, Dynamic Programming, Flow in Networks, Elementary Graph Theory, Game Theory Simulation        |        |
